An Alternative

For many of us the time comes when we need assistance to maintain our quality of life. If this occurs there is an option to nursing home care. Hospitality House on Dayton Lake provides a private family environment designed to encourage health and well being.

Family Care

We appreciate the normal schedule of family and encourage good rest. We encourage you to sleep on your own schedule, eat breakfast when you want and enjoy your own way of living.

Quality Care

Our family of nurses and trained staff are available to provide advanced and transitional care when needed. We specialize in pain control and restoration to speed your recovery and maintain your abilities. We provide short and long-term care. Most of our clients come to our home expecting to remain long term, but with strong supportive care they are able to move to their own home or apartment within a few months.

“We are more effective when we are able to work together..... She has never looked better.” FFMG Physician

Our Staff

At Hospitality House on Dayton Lake all primary care is provided by the Frank family and a very small staff of dedicated professionals. This provides a continuity and intimacy that can never be found in a staffed institution such as a nursing home. Our RN staff averages five years with us and 22 years

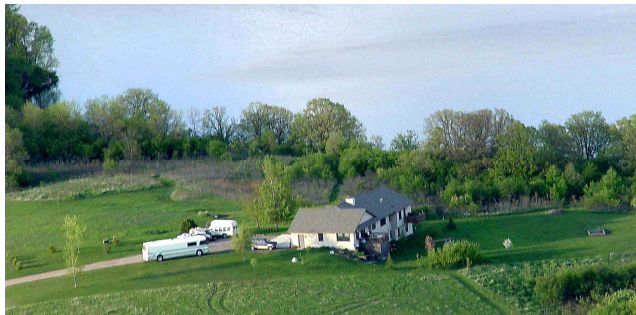

of experience. Our full time CNA’s average three years with us and 13 years experience.

Mary Anne Frank, RN, our Nursing Supervisor has served as a Registered Nurse since 1974 in many traditional and alternative settings including Surgery, Pediatrics, Home Care, Public Health and as a Nurse Educator.

Mel Frank was first licensed as a nurse in 1975 and has worked in Nursing Homes, Orthopedics and Trauma. For the last twenty years his primary interest has been business growth and development.

Our young daughter and grand-children provide the activity and joy that every household needs for good health.

We all work together to help you win at life.

The Setting

Ten open acres of woods, water, deer and pasture on Dayton Lake near Fergus Falls. Sunrise over the water and sunset over farmland. Far enough from the city to enjoy the singing of birds but only ten minutes from town. Our home is new, inviting, and designed for ease. The family room is near the kitchen and is filled with plants, light and a wonderful view.

Over the years we have provided care for over fifty individuals in our home. If you need extended or short term care and would prefer a private setting rather than an institution please give us a call at 218-739-6188. We will work with you to provide a healthy and comfortable lake home setting that will meet your physical, mental and spiritual needs.

Licensed by the State of Minnesota

“When I arrived at your home I never really wanted or expected to do anything by myself again, including walking. The warmth, friendliness, and home like atmosphere of Hospitality House made the difference thanks for being there.”

“Thank you from the bottom of our hearts for allowing Dad to live in your home, and for choosing him from among the many applicants who would also have loved to have been under your care.”
